

Wide input voltage , non-isolated & regulated single output

Patent Protection **RoHS** **CE**

FEATURES

- Efficiency up to 96%
- Operating temperature range: -40°C to +85°C
- Low ripple & noise
- Supporting negative output perfectly
- Short circuit protection and overheat protection
- Subminiature SIP package, meeting requirements of UL94-V0
- Pin-out compatible with LM78XX series
- EN60950 approved

K78xx-500R2 series are high efficiency switching regulators and ideal substitutes of LM78XX series three-terminal linear regulators. The product is featured with high efficiency, low loss, low radiation and no heat sink requirement. They are widely used in industrial control, instrumentation, and electric power applications.

- Note:
- When the products used as negative output and the input-voltage under ($V_{in-min}+2V$), C1 and C2 must be added in the circuit, and they should be placed as near as the products' footprints. Others apply to the application-environment.
 - The capacitance of C1,C2 sees external capacitor table, it can be increased properly if required, and tantalum or low ESR electrolytic capacitors may also suffice.
 - When the products used as the circuit like figure 7, an inductor named as LDM up to 10μH is recommended in the circuit to reduce the mutual interference.
 - For the product of output voltage is below 3.3V or at 3.3V, if the input voltage of model's negative output is less than 4.85V, The output need to add a dummy load of not less than 5mA.
 - Cannot use in parallel for output and hot swap for input.

To reduce the output ripple furtherly, it is suggested to connect a "LC" filter at the output terminal, and recommended value of L is 10μH-47μH.

Notes:

1. Packing Information please refer to 'Product Packing Information'. Packing bag number: 58200003;
2. The max. capacitive load should be tested within the input voltage range and under full load conditions;
3. Unless otherwise specified, data in this datasheet should be tested under the conditions of Ta=25°C, humidity<75% when inputting nominal voltage and outputting rated load;
4. All index testing methods in this datasheet are based on our Company's corporate standards;
5. The performance indexes of the product models listed in this manual are as above, but some indexes of non-standard model products will exceed the above-mentioned requirements, and please directly contact with our technician for specific information;
6. We can provide product customization service;
7. Specifications of this product are subject to changes without prior notice.
